3.2 (b)

INDOOR HOUSING FACILITIES.

(b) Ventilation.

In the kennel facility there is an approximately 45 foot transport type trailer that is acting as indoor housing. In the trailer there is one exhaust fan on the southern end. Upon entry to the trailer there was a strong ammonia smell which burnt the nose and throat. The trailer needs additional ventilation to provide for the health and well-being of the contained animals.

Affects forty-nine adults.

Correct by August 15, 2010

3.6 (a) (2) (x)

PRIMARY ENCLOSURES.

(x) Have floors that are constructed in a manner that protects the dogs' and cats' feet and legs from injury,-

In the whelping room there are adults and puppies. In one of the raised wire enclosures there was a mother with three two week old puppies. During the inspection the puppies were observed with their feet falling through the coated wire flooring. All enclosures must have floors that are constructed in a manner that protects the dogs' feet and legs from injury, and that, if of mesh or slatted construction, do not allow the dogs' feet to pass through any openings in the floor. The flooring must be repaired or replaced to protect the puppies from injury.

Affects three puppies.

Correct by August 13, 2010

The inspection and exit brief was conducted by the Dealer and Sandra Meek, ACI.

The last inspection was conducted on September 28, 2009.

2.50 (a)

TIME AND METHOD OF IDENTIFICATION.

(a) A class "A" dealer (breeder) shall identify all live dogs and cats on the premises-

Through-out the kennel facility there are a total of seventeen adults and seven puppies which do not have any form of identification. The adults were verbally identified by the dealer on the record of dogs on hand as not having a microchip, tattoo or collar. All animals on the premises must have an approved form of identification at all times.

Affects seventeen adults and seven puppies.

Correct by October 28, 2009

3.1 (c)

HOUSING FACILITIES, GENERAL.

(3) Cleaning. Hard surfaces with which the dogs or cats come in contact must be spot-cleaned daily and sanitized.

On the western side of the kennel facility there are three enclosures whose shelter structures are located inside of a barn and two enclosures on the exterior of the home with individual shelters. These enclosures and shelter structures have a build up of dirt on the surfaces which need to be cleaned and maintained to facilitate cleaning and to protect the health and welfare of the contained animals.

Affects ten adults.

Correct by October 6, 2009

3.11 (c)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

(c) Housekeeping for premises. Premises where housing facilities are located, including buildings and surrounding grounds, must be kept clean and in good repair to protect the animals from injury, to facilitate the husbandry practices.

On the exterior of the home there are two primary enclosure which contain a total of five adults and an exercise pen which during the inspection contained nine adults. In this area there was a pile of debris such as plastic, metal, wood

3.2 (b)
INDOOR HOUSING FACILITIES.

3.2(b) Ventilation.

In the kennel facility there is a trailer which is used as interior housing for adult animals. Upon arrival at the kennel facility one of the rear doors were open. Both doors were open during the inspection of the trailer. The ammonia in the trailer was extremely strong and burnt the eyes, nose and throat. The trailer needs additional ventilation to protect the health and welfare of the contained animals.

Affects fifty-three adults.

Correct by March 10, 2009
